Light is Life

URBAN STYLE

City life is a constant rush – towards something new, something better, something unknown. It's a hunger for experience, a desire to explore the mysteries that the city has in store for us. Energy is constantly flowing in the narrow streets, spacious parks, among extraordinary monuments and modern office buildings. Light is an energy that gives drive and never lets the city sleep.

**Get caught up in these vibrations and start living in an urban style.
Your style.**

URBAN STYLE

A story about light

Get ready for an extraordinary adventure. Let us take you on a journey to places that never sleep.

You don't have to limit yourself anymore. Enjoy your freedom and decide what you want to do. Take a walk in the middle of the night? Party till the morning? Or maybe follow your passion, working well into the late evening hours? Is anything standing in your way? Not anymore. **Light is brilliant** - it creates spaces with identity and personality.

Find out for yourself how the city changes at night. How the buildings and interiors take on a new identity and personality, depending on the way they are illuminated. We design our luminaires in accordance with a new direction that improves well-being and comfort. **Light is revealing**. Let it seduce you and see where it takes you.

Light play is an inspiration for the greatest artists. Only the best of them know how to use light to bring out the hidden spaces and give them a completely new character. The unlimited possibilities of lighting arrangements make it tempting to keep experimenting. **Light is inspiring.** Get inspired, too.

The sun is the most perfect light source, without which life would not exist on Earth. In lighting design, our goal is to come closer to this ideal. Today we are very close to achieving this goal. Cities illuminated at night seduce with their vibrant, inexhaustible energy. **Light gives life.** Use it and take full advantage of the possibilities it offers.

Discover urban style

Let us join you on this urban adventure.

The city has an infectious energy. It holds infinite possibilities for work, fun, and relaxation. Everyone will find something for themselves. Futuristic office buildings, lively clubs, secluded streets, and cozy cafes. Boredom is not an option. Feel the energy and take advantage of all the opportunities that urban life has in store for you.

Workspace

Workspace has long since broken out of closed office walls. Nowadays, it takes a form of social and professional meetings at coffee shops, brainstorming projects in the park, videoconferences with people on the other side of the world, or finishing tasks in the comfort of your own home. You need lighting that will not limit you. Light that will let you work comfortably in any situation. A lamp that will work with you, in your style.

Focusing on details

You know how important details are. In your projects, you make sure to work out every single detail. You need a lamp that will let you focus on what is most important to you. One that will light up each detail.

Iris

a reliable design with a timeless form.
Unleash your creativity.

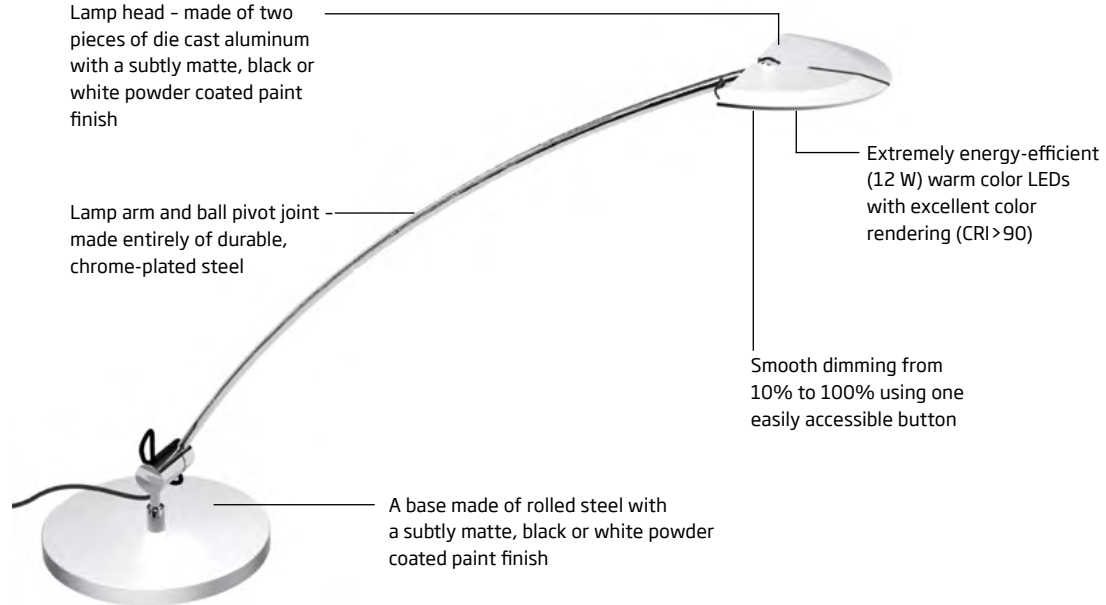

Lamp head - made of two pieces of die cast aluminum with a subtly matte, black or white powder coated paint finish

Lamp arm and ball pivot joint - made entirely of durable, chrome-plated steel

Extremely energy-efficient (12 W) warm color LEDs with excellent color rendering (CRI > 90)

Smooth dimming from 10% to 100% using one easily accessible button

A base made of rolled steel with a subtly matte, black or white powder coated paint finish

Iris Arch

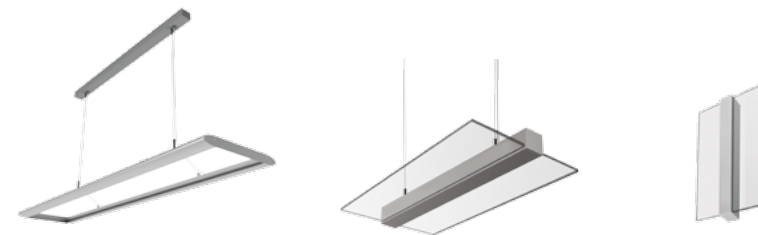

a combination of subtle form with practical design thinking.

Embrace your professionalism.

Just like daylight

Your holistic outlook on life is also reflected in your style of work. Don't sacrifice transparency or natural light. For you, it is the end result that really matters. You tackle your tasks with a comprehensive approach and you like to look at them from a wider perspective. You need lighting that will give you the same working comfort in each and every corner of the room.

System Transparent

its advanced construction provides exceptionally uniform light and completely eliminates unpleasant glare. **Give yourself the space to create.**

designed by Mats Thorén & Lars Bylund

System Bracket

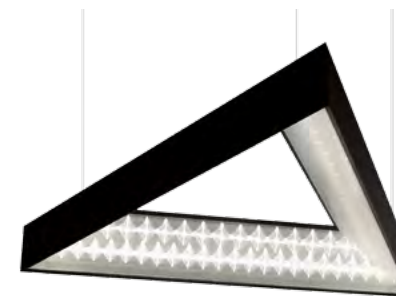

efficiency and energy savings enclosed in a minimalist design, suitable for creating linear constructions. **No need to be trapped in a rigid framework.**

Playground

The city is always inviting you to come out and play. Lively dance clubs, smiling people, bustling nightlife, illuminated streets. This time is just for you. **Use it the way you want to.**

Time for creativity

Don't limit yourself. Arrange your life and surroundings in an unconventional way. Play around with the form. Create a space that brings out your playful side and unleashes your creativity.

Triangle

a unique system that allows you to create intricate, multi-level arrangements.

Think outside the box and have fun with the form.

designed by Medusa Group

System Why

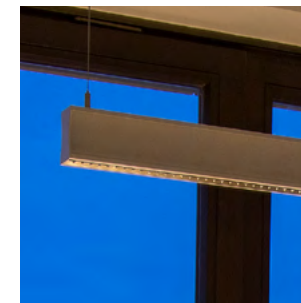

shines bright in four directions and in different configurations - upwards, downwards, and sideways. Color changing LEDs are installed on side panels of the luminaire.

Now all you have to do is unlock your creative potential.

Two types of lighting in one luminaire:

General lighting - the WHY system shines in four directions, ensuring the perfect illumination of the entire space

Task lighting - directing the light beam downwards makes it possible to accurately light up the workspace without causing glare

Jasmine

personalize individual panels in any configuration to create a different lighting arrangement every time.

Do not compromise your wellbeing.

Retro Party

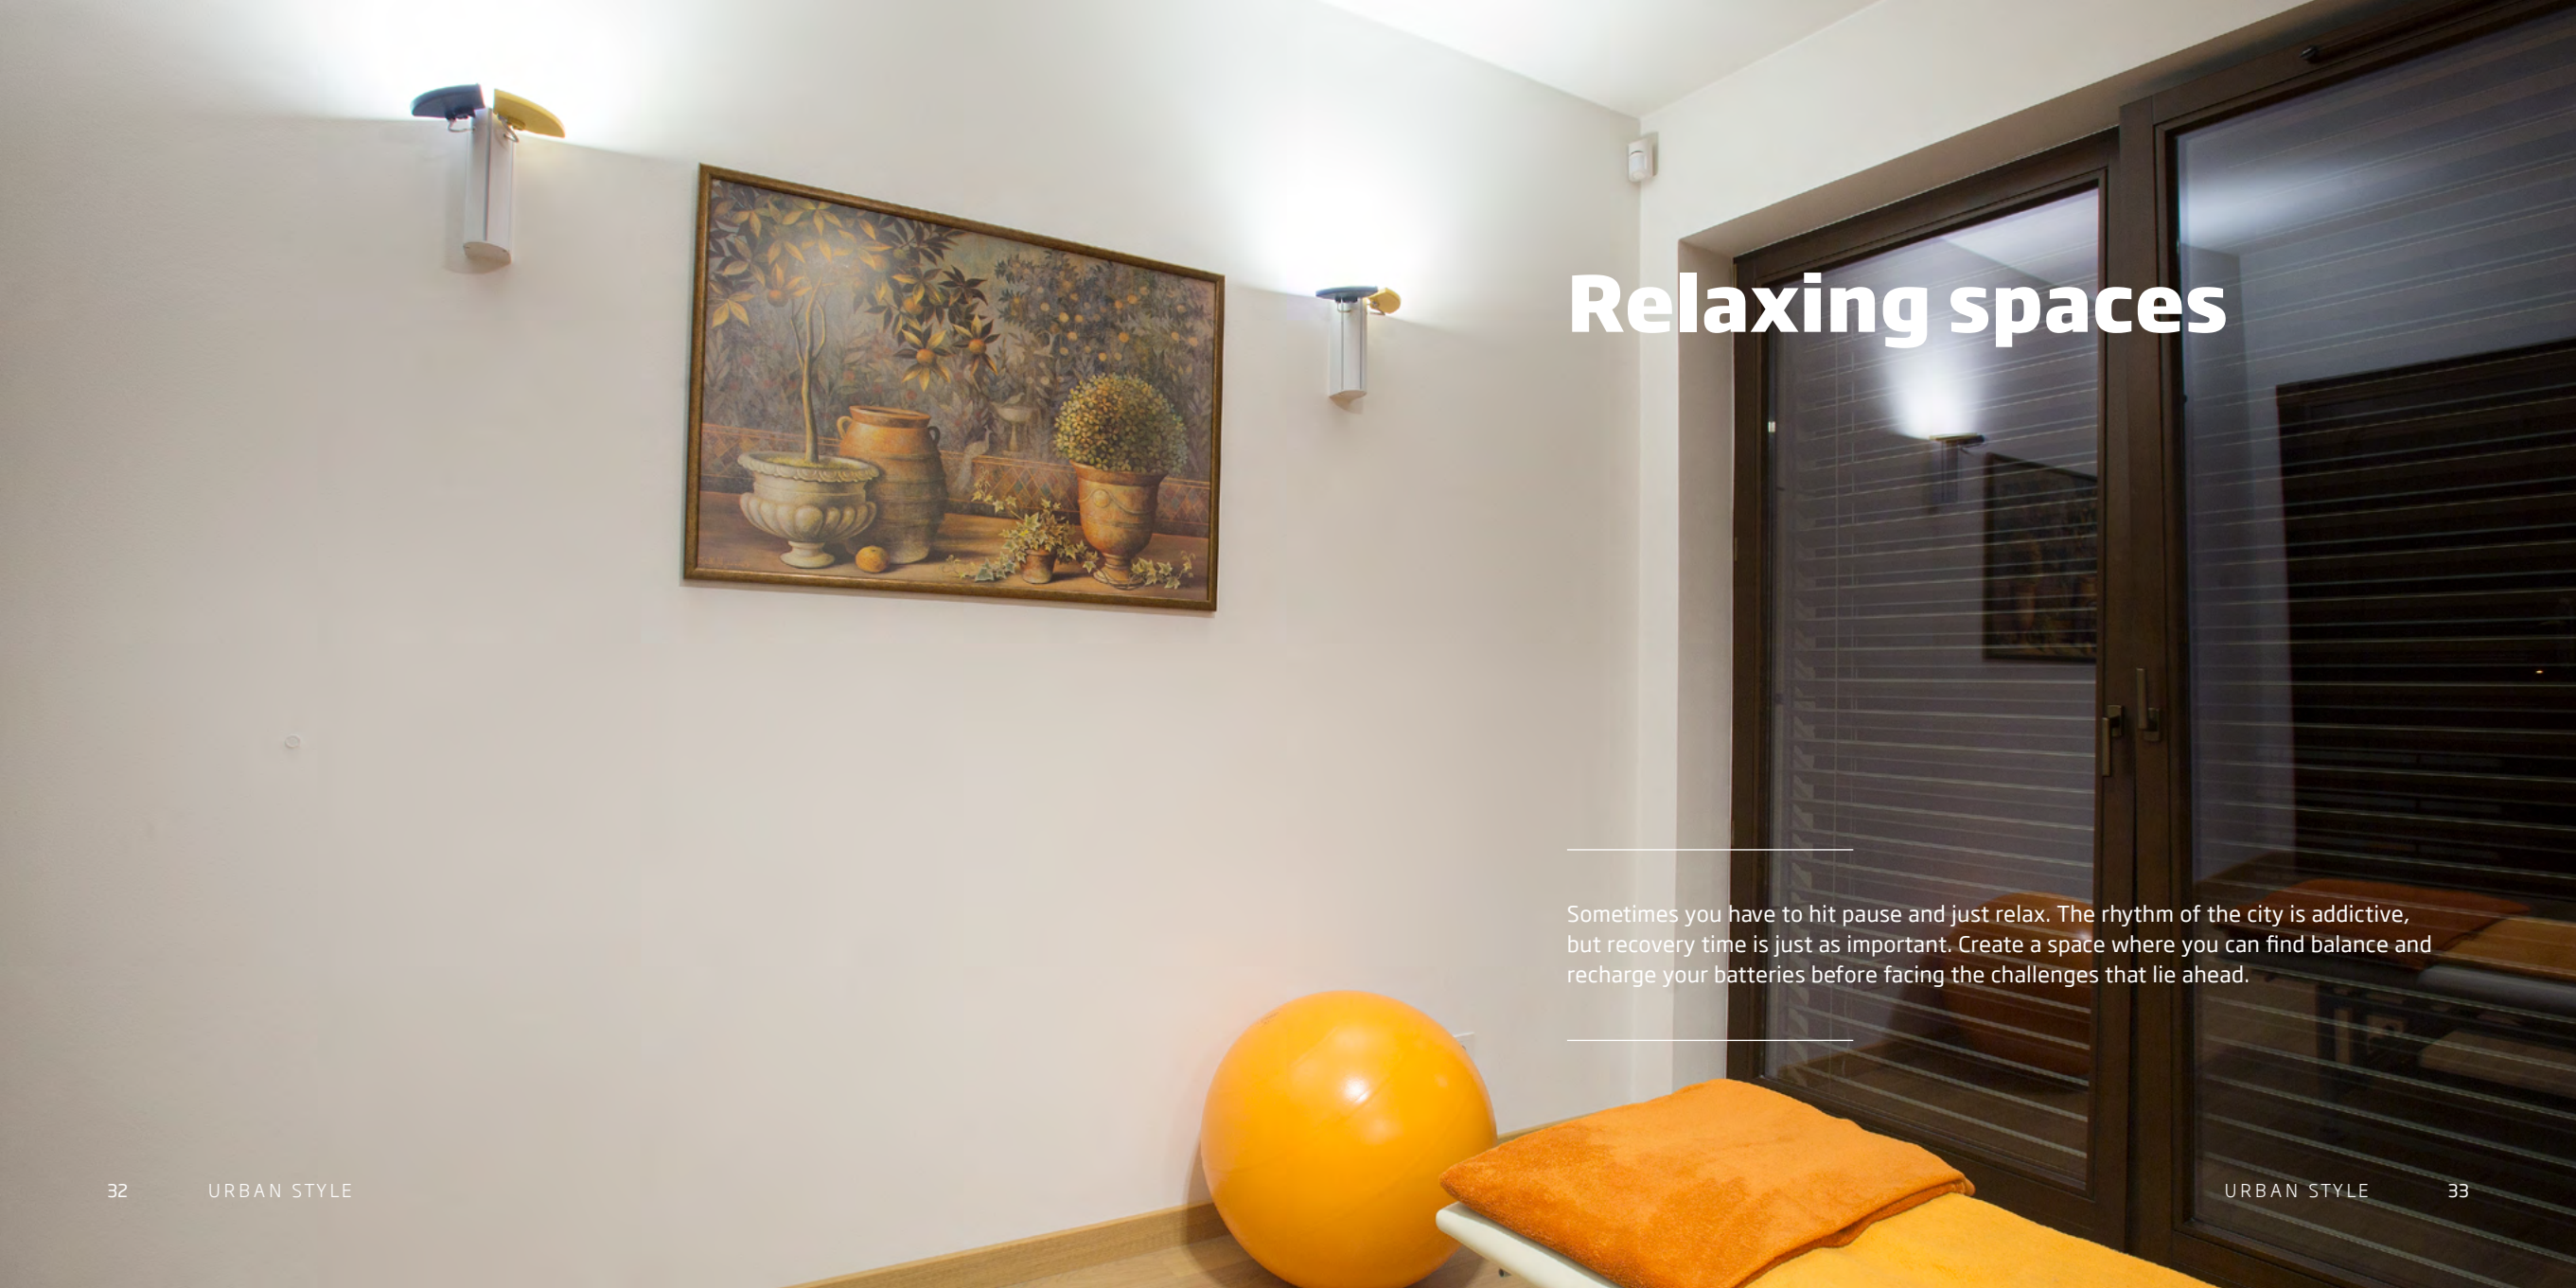

The way we live today was shaped by our past. Everybody likes to look back on fond memories. An impulse is all it takes to let carefree moments from the past bring us joy in the present. Go back in time. Don't be afraid to be RETRO.

Retro

a large, aluminum luminaire reminiscent of vintage industrial lamps. A captivating choice for interiors where original style is what counts.

And what history shaped you?

Relaxing spaces

Sometimes you have to hit pause and just relax. The rhythm of the city is addictive, but recovery time is just as important. Create a space where you can find balance and recharge your batteries before facing the challenges that lie ahead.

Look at the world from a different angle

Every once in a while, it's good to look at the speeding world from a different perspective. Stop. Let others waste time pointlessly running around. Sit down and find your inner peace.

Lotus

a small wall lamp that can be rotated 360°, allowing you to direct the light anywhere you need.

Find your inner balance.

Angle 30

a luminaire that uniquely lights up the room with indirect, reflected light, creating a cozy atmosphere. Don't let your world stand on its head all the time - **let yourself relax for a moment.**

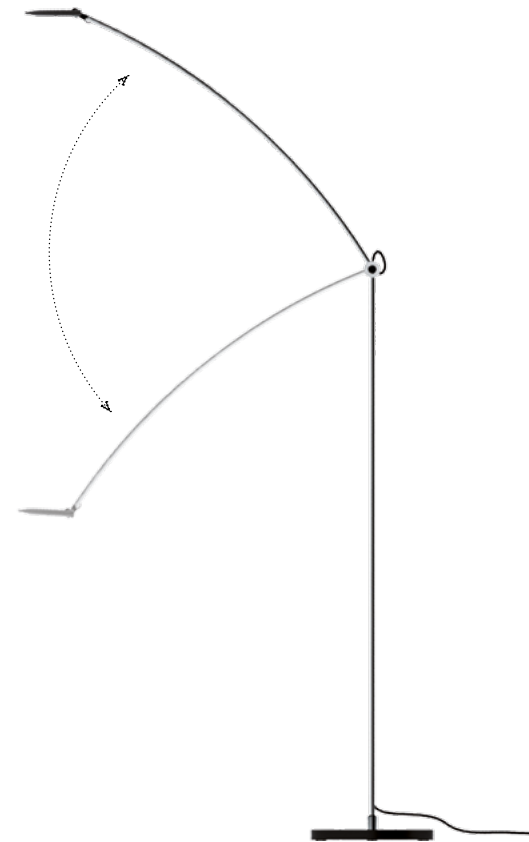

designed by Mats Thorén & Lars Bylund

Iris Deco

a modern, standing floor lamp that will create a relaxing atmosphere in your living room or bedroom.

Create a quiet space where you can wind down.

Luna Dynawhite

an extraordinary luminaire that can change the ambience of your home in seconds thanks to its smooth light color changing. **Relax in the moonlight, no matter the weather.**

Relax - naturally

Nothing soothes the nerves like resting out in the open and being one with the nature. Lush greenery, a warm wind, birds singing in the distance. Close your eyes and feel the delicate brightness of the flowers.

Tulip Wall

an outdoor wall sconce that will help you impress your guests and neighbors. **Take good care of your hearth and home.**

Tulip

a modern garden lamp with adjustable petals that will let you create unforgettable lighting arrangements in your garden. **Let your space shine just the way you want.**

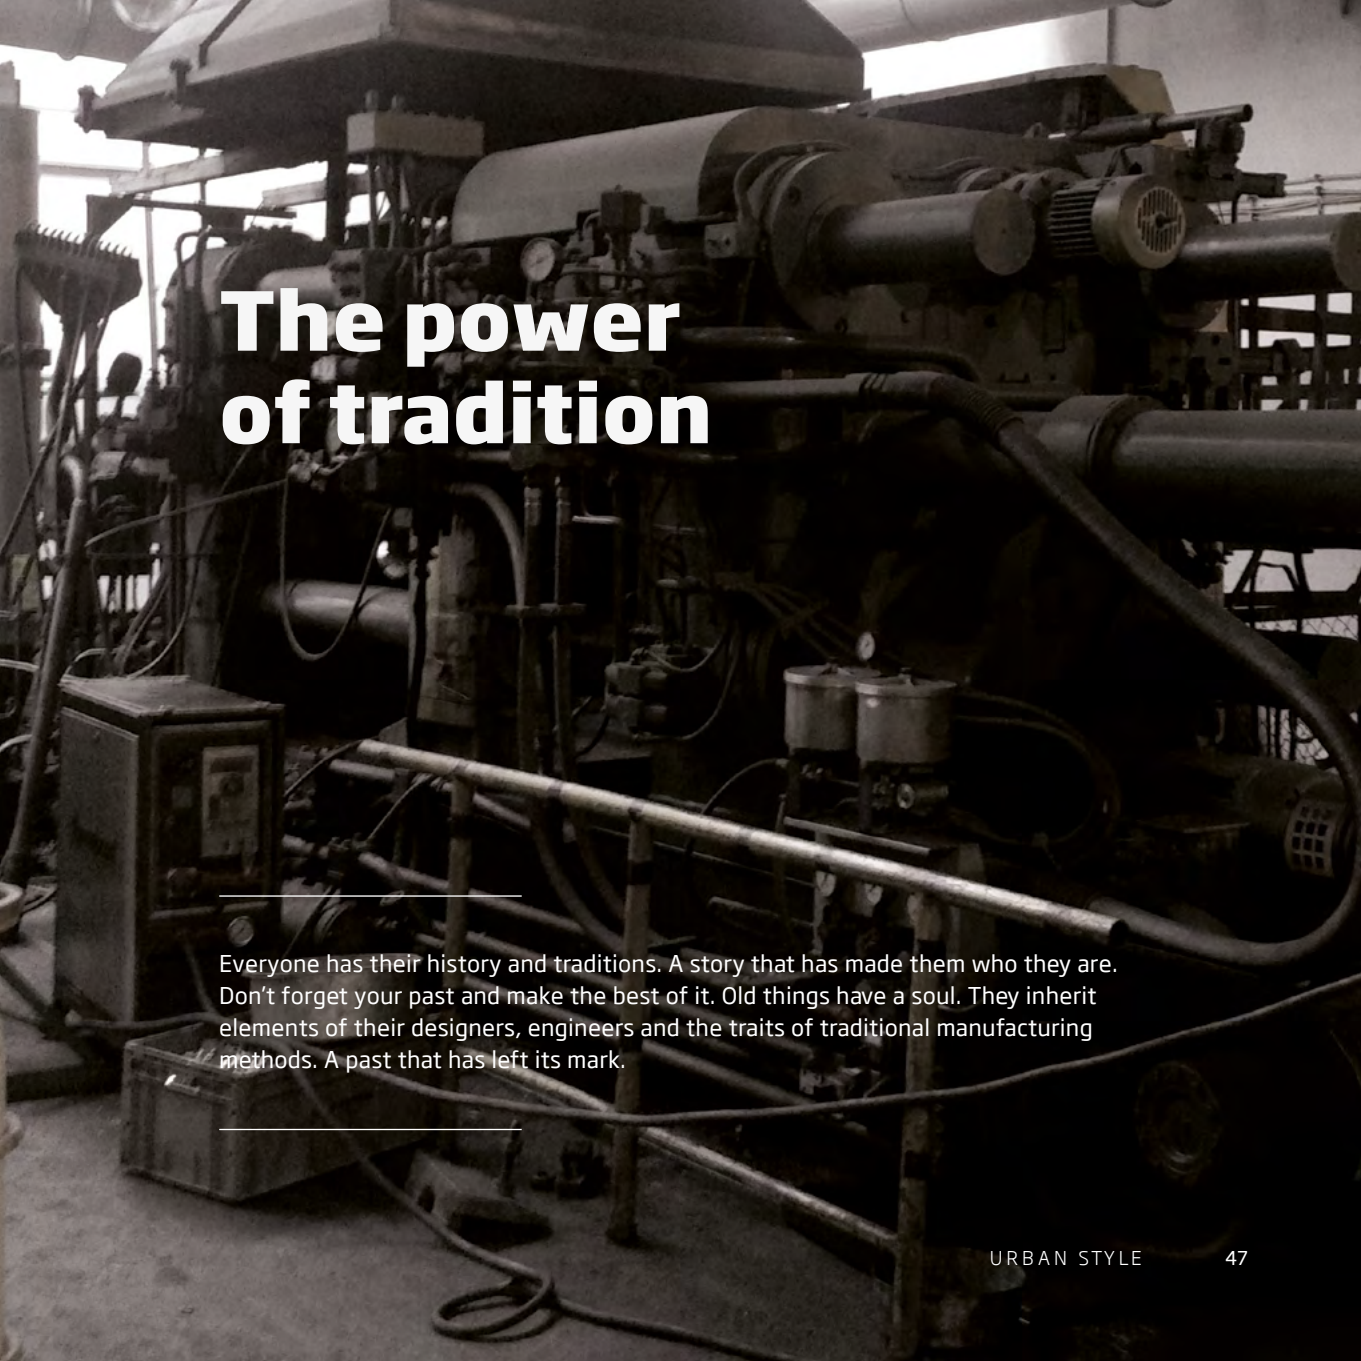

Uran

small light points installed in the driveway or sidewalk in front of the house create unique guiding lights. **Lead your guests straight to your kingdom.**

Opera

this exceptionally waterproof luminaire can be installed in a pool or pond. **Now you can let your fantasies set sail.**

The power of tradition

Everyone has their history and traditions. A story that has made them who they are. Don't forget your past and make the best of it. Old things have a soul. They inherit elements of their designers, engineers and the traits of traditional manufacturing methods. A past that has left its mark.

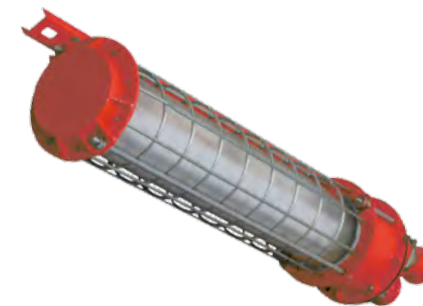

A new life

We can combine these stories with modernity. Enjoy a product with the latest technology disguised in a traditional form. You can give it a new life. Use it to create unforgettable arrangements. Courage needs no justification.

Saturn

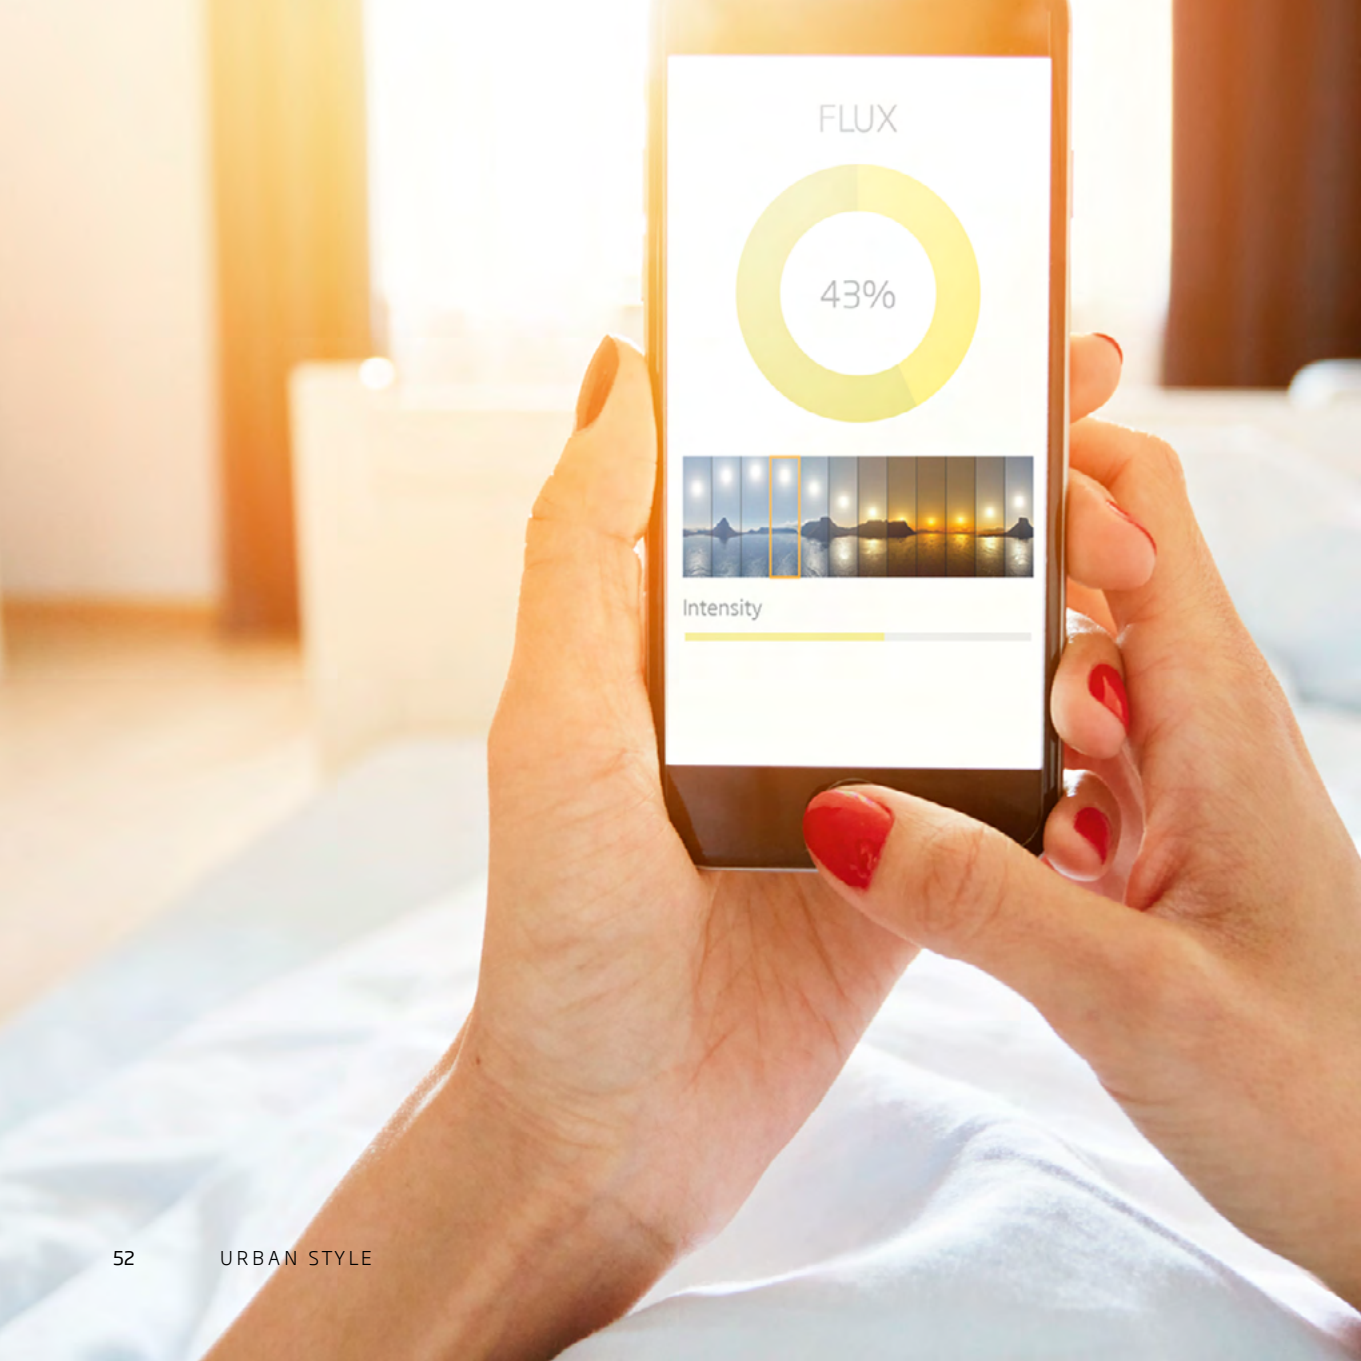

an original industrial lamp that perfectly complements raw loft interiors. **You know it's all about courage.**

Krypton

this explosion-proof mining lamp can survive anything.

Exclusively for those who aren't afraid to swim against the current.

Cosmo FX Circadian

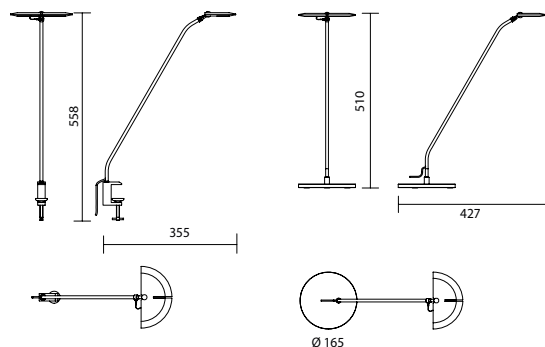

a unique luminaire that mimics natural daylight and harmonizes with your circadian rhythm. A real boost for your daily activities. **Coming soon. Don't miss it!**
